1.30PM TO 5.10PM

ONLINE, BY RESERVATION ONLY

CERT WEBINAR 2022

9TH COMPANY EMERGENCY RESPONSE TEAMS WEBINAR

ABOUT A-CERTS

The Association of Company Emergency Response Teams (Singapore) (A-CERTS) is a non-profit organisation which is established in the year of 2011, with the support from Singapore Civil Defence Force (SCDF).

Since then, A-CERTS has embarked on a journey to establish a credible platform for emergency responders and companies to join as individual/corporate members to share their experience and network with each other. We also aim to create, professional development opportunities within our fraternity.

With the aim to constantly to be on par with the industry standards of excellence and developments, A-CERTS continues to work side-by-side with government agencies in developing and enhancing training courses and setting quality benchmarks in the field of Emergency Response & Crisis Management.

ABOUT THE WEBINAR

A-CERTS' annual event is back once again in 2022 with a whole new significant agenda specially crafted for the emergency responders, fire safety, EHS and WSHO professionals. The Organising Committee of the CERT Webinar 2022 has gone a step further to explore against the normal roles and responsibilities of these professionals.

Every year, the goal of CERT Seminar is to provide a platform where authorities, industry leaders, and related professionals share their vast experiences and valuable insights of their professional knowledge and skills.

This Webinar is expected to highlight interesting and innovative subject matters, presented by highly distinguished experts. The agenda will focus on relevant and contemporary issues that will stir the minds of these professionals into exploring new ways to ensure a safe and secured environment.

A-CERTS is expecting to receive about 3000 participants to be a part of this Webinar, ranging from emergency responders, fire safety, EHS, WSHO and other related executives, managers and directors.

ABOUT THE THEME

The theme **"Managing CERT in the New Normal"** will be the key focus for the 9th Edition Company Emergency Response Team (CERT) Webinar where insightful information in addressing the emergency preparedness issues is discussed. The Webinar will also take an in-depth look in discussing the best practices related to potential emergency scenarios from various industries, as well as, the effective response plans and procedures, benefitting the participants with knowledge in designing and articulating the emergency response plan.

A-CERTS strives to explore the latest regulatory compliance, making sure the industry stays informed and relevant. Best practices and experiences are shared which could transform the CERT team in responding to incident in a timely manner to stabilise an incident and minimise potential damage. The half-day Webinar will enable the Fire Safety and Emergency Responders be aware of the latest best practices and innovation technology which could be useful in building and sustaining an effective CERT Foundation in an organisation.
