A.M. SESSION OR FULL DAY (FEES APPLY ACCORDINGLY).

ABOUT A-CERTS

The Association of Company Emergency Response Teams (Singapore) (A-CERTS) is a non-profit organisation which is established in the year of 2011, with the support from Singapore Civil Defence Force (SCDF).

Since then, A-CERTS has embarked on a journey to establish a credible platform for emergency responders and companies to join as individual/corporate members to share their experience and network with each other. We also aim to create, professional development opportunities within our fraternity.

With the aim to align with the industry standards of excellence, A-CERTS continues to work side-by-side with government agencies in developing and enhancing training courses and setting quality benchmarks in the field of Emergency Response & Crisis Management.

ABOUT CERT CONNECT 2022

CERT Connect is another annual event of A-CERTS, albeit on a smaller scale than the CERT Seminar.

It is through the CERT Connect platform that we organise presentations, dialogues, engagement workshops and learning sessions where different Tiers of CERT members, stakeholders, industry leaders, and authorities can come together. The purpose is to share new ideas and initiatives, including the re-certification programme, that could benefit the premises and its CERT members, FSMs and WSHOs.

PROGRAM - A.M. SESSION

- 9.10 - 9.30 AM** **REGISTRATION / GUESTS TO BE SEATED**
- 9.30 - 9.40 AM** **OPENING SPEECH**
- 9.40 - 10.10 AM** **MANAGING RISKS IN HOSPITALITY INDUSTRY**
Mr. Shir Khan
- 10.10 - 10.40 AM** **NETWORKING MORNING TEA BREAK**
- 10.40 - 11.00 AM** **UPDATE ON CERT RECERTIFICATION FOR TIER 1 PETROLEUM AND FLAMMABLE MATERIALS (P&FM) PREMISES**

Ms. Rennysa Bte Ithnin
Association of Company Emergency Response Teams (Singapore)
- 11.00 - 11.45 AM** **OVERVIEW OF SCDF FIRE SAFETY REGULATORY FRAMEWORK & EMERGENCY PREPAREDNESS REQUIREMENTS FOR PREMISES**
- 11.45 - 12.00 PM** **PLAQUE PRESENTATION & CLOSING / END OF A.M. SESSION**

PROGRAM - P.M. SESSION

1.30 - 1.45 PM **REGISTRATION / GUESTS TO BE SEATED**

1.45 - 5.00 PM **[WORKSHOP] DEVELOPING EMERGENCY MANAGEMENT CAPABILITY FOR SMC, SIC, FSM AND EMERGENCY PLANNERS**

Mr. Noor Azlan, MD, ERCM Consultancy
Mr. Andy Choo, Director, EFI Global Asia

1.45 - 2.00pm	Introduction
2.00 - 2.45pm	Emergency Preparedness
2.45 - 3.30pm	Incident Management
3.30 - 3.50pm	Tea Break
3.50 - 4.45pm	Incident and Fire Investigation
4.45 - 5.00pm	Summary and Closing

5.00 PM **END**

A.M. SESSION SYNOPSES

Managing Risks in Hospitality Industry

Mr. Shir Khan

The level of preparedness in the hospitality industry seems to be lagging behind the oil and gas industry. This could be due to the nature of business, lack of regulatory compliance and awareness. Shir Khan will be discussing the challenges of managing risks in the hospitality industry, in particular in emergency management.

Update on CERT Recertification for Tier 1 Petroleum and Flammable Materials (P&FM) Premises

Ms. Rennysa Bte Ithnin, A-CERTS

Following Ms Rennysa's presentation at our CERT Webinar 2022, on 25 March 2022, she will present on recertification programmes held at other premises since the roll out of the CERT Recertification for Tier 1 Petroleum and Flammable Materials (P&FM) Premises.

Overview of SCDF Fire Safety Regulatory Framework & Emergency Preparedness Requirements for Premises

This is another SCDF's presentation after sharing at our CERT Webinar 2022, 25 March 2022. The said topics will cover Fire safety regulatory framework and emergency preparedness measures which ensure high fire safety standard in buildings and the importance of collective effort in fire safety remains the best safeguard against the consequences of fire.

P.M. SESSION SYNOPSIS

Developing Emergency Management Capability for SMC, SIC, FSM and Emergency Planners

Mr. Noor Azlan, MD, ERCM Consultancy
Mr. Andy Choo, Director, EFI Global Asia

Unlike other disciplines of resilience management, emergency management is the 'sprinting element' of managing the direct consequences of an incident. It is immediate, decisive and quickest to end among other disciplines of resilience management. Pegged at the Tactical and Operational levels of response, it has a direct impact and link to the Strategic level of response to ensure alignment to organisational goals.

This Workshop has touchpoints across the pre, during and post incident phases. The trainers will use real life experiential sharing in both the private and public sectors. The workshop has all the elements to evoke your senses so that you will take away the knowledge and experiences in your familiar styles of learning.

It will make you Rethink about the value of the Emergency Response Plan; Redefine your scope of Emergency Preparedness and Response; and Redesign your Emergency Capability based on your risks, risk appetite, firefighting strategy, and the national authority's capabilities.

WORKSHOP SPEAKER PROFILE

Mr. Noor Azlan is a Business Continuity Management, Crisis Management, Emergency Response and Fire Safety practitioner and trainer with 27 years of experience. He is versatile in both public and private sectors.

While in the Singapore Civil Defence Force (SCDF), he was awarded the National Commendation Medal (2011); and the Overseas Service Medal (1999) for his role as Head of Operations in the Ops Lionheart mission. He was a former Commander of a fire station in Singapore. While in the Civil Defence Academy, he had successfully trained and prepared over 4,500 Emergency Response Specialists and 1,000 Senior Officers to take on their frontline roles in SCDF.

Azlan held a global responsibility for the EMAS Group (upstream oil and gas and marine services business) in the fields of Emergency Response, Crisis Management, and Business Continuity Management. He is a proven and tested expert in his field and he had won the prestigious Best Continuity and Resilience Consultant in Asia in 2017, awarded by the Business Continuity Institute (UK). He had also attained the Top 100 Trusted SME in Singapore in 2018 as part of the Singapore Enterprise Medal of Honour.

He trains professionals regularly in emergency response planning for both commercial and industrial premises across Asia, Middle East and Africa. Azlan is an Associate Faculty member of the National University of Singapore and the Singapore University of Social Sciences where he lectures on the entire spectrum of resilience management and fire safety related topics.

WORKSHOP SPEAKER PROFILE

Mr. Andy Choo had through his 18 years of service in the SCDF represented SCDF in conducting at least 12 conference talks on fire investigation case studies and fire statistics, to a total of about 15,000 fire safety managers and industrial experts. His certifications, training and experience gained from the many fires he investigated saw him administering and facilitating the learning of about 40 dedicated fire investigation courses for SCDF frontline leaders and forensic investigation units from local and overseas agencies. He has also peer-reviewed more than 5,000 fire reports, investigated and created over 300 detailed fire investigation reports. Andy represented the SCDF on multiple occasions in the State Court as the expert witness.

Valuable insights gained from his training stint, incident mitigation, exercise planning and preparation allowed Andy to put his readiness and emergency preparedness knowledge to good use. As the Chief Inspectorate, he audited the emergency preparedness of SCDF's operations and validated the enterprise risk management measures of the organisation. As Commander of Woodlands Fire Station, he commanded the extinguishment of huge fire and rescue incidents with his crew, as well as planning for and executing emergency preparedness exercises of national scale at high-risk installation in the northern sector of Singapore.
